# Welcome to InkPDF

This is a test build of InkPDF for Android.

Draw on this page with a finger or a stylus.
Pinch to zoom, drag with two fingers to move around.
Tap the disk icon (top left) to save: a card asks where,
and offers the app’s Documents folder.

Not working yet on Android: pen pressure, eraser end and
barrel button (they need the stylus reader), opening files
from other apps, the clipboard.

A page to write on
